A NEW NAME TO REMEMBER

WINSOROCK

HIGHWAY SALT

**OF YEAR-ROUND VALUE
IN YOUR ROADS PROGRAMME**

WINSOROCK is now the registered trade name for the highway grade of our Canadian-mined salt. To be sure of the right grade for your road programme, simply mark your salt order WINSOROCK. Then you will be *sure* of re-

ceiving the highest grade, mined-in-Canada highway salt.

**Keep WINSOROCK
ready for these
important jobs.**

1. For stabilized roads and base courses

In your plans, stabilized roads may be intended to act as base courses for future surfacing, or to remain and be maintained as secondary roads. In either case, SALT can do a splendid low-cost job for you in making them dense, strong, serviceable, all-weather roads requiring little maintenance and saving you money every year.

2. For winter maintenance

In the annual battle with snow and ice SALT is the maintenance chief's most dependable and effective weapon for keeping roads and streets clear and safe throughout the winter — proved by years of experience under Canadian winter conditions. To save labor, materials and money, adopt the Salt winter maintenance plan and get the best job ever!

Put SALT to work in your municipality this year — let it prove its worth. You'll be glad you did!

Write for more information or ask for one of our men to call.

The CANADIAN SALT COMPANY Ltd.

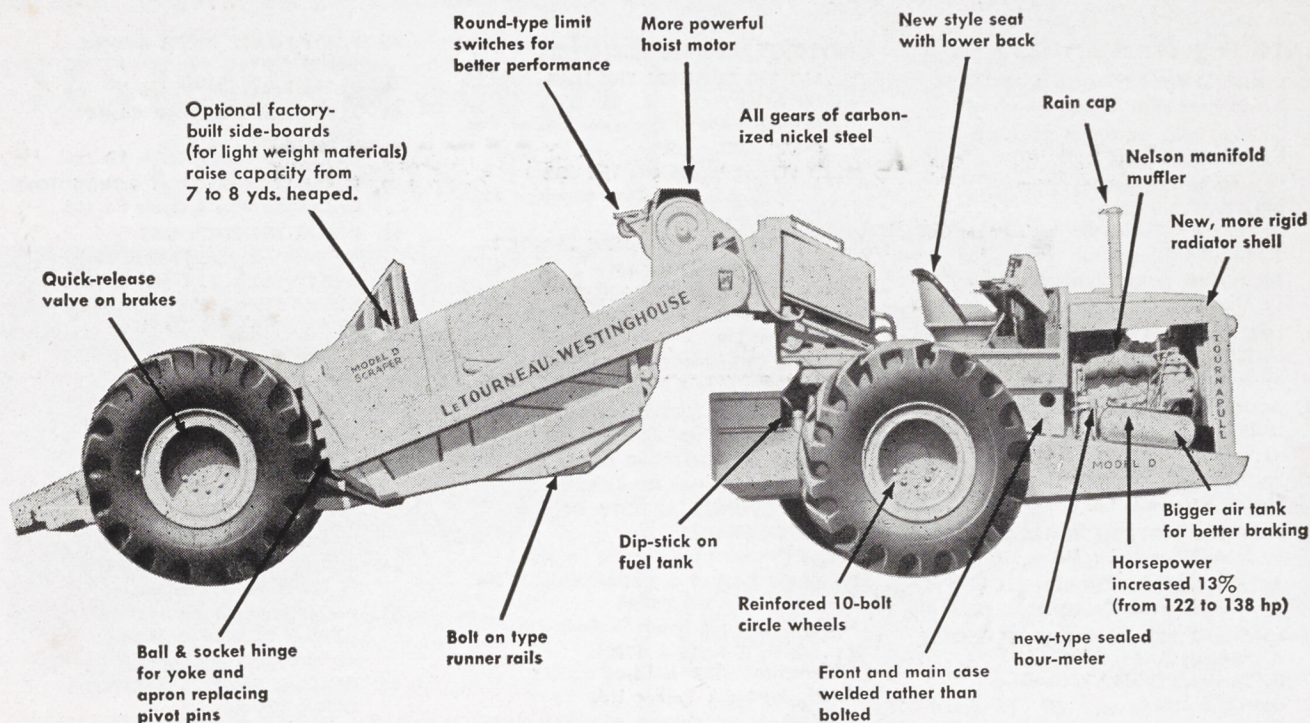

Head Office — 625 Dorchester Street West, Montreal, P.Q.

Sales Offices at:

SAINT JOHN, N.B. • QUEBEC, P.Q. • MONTREAL, P.Q. • TORONTO, ONT. • WINNIPEG, MAN. • EDMONTON, ALTA.

Today's "D" is a better "D"

Important improvements now standard on current production models

The improved D Tournapull can fill your needs for fast, flexible, economical dirtmoving even better today than ever before.

On production dirtmoving, its superior speed will give you greater output and lower-cost-per-yard than can crawler-scraper combinations in the 75 to 100 hp and 8 to 11-yd. class.

Speed of 28 mph on rubber allows the "D" to travel anywhere fast. Rig needs no planking . . . no loading or unloading . . . is light and narrow enough to go through cities, over county roads, and across bridges.

You can work "D" in pusher-fleets of "D's" or mix with bigger rubber-tired units. For smaller

Write or phone our nearest Western office for more information on "D" or other model Tournapulls.

production jobs you can team 2 dozer-equipped "D's" for push-loading each other. Or, you can send one "D" out alone for effective self-loading on small-yardage or clean-up jobs. It is the most versatile dirt-mover on the market . . . a profit-maker on every assignment.

Try a new "D" on your job. You'll find the improvements shown (standard on current models) will give you a better-performing machine than ever before.

ROSCO

"TESTED" Products Cut Costs

ROSCO SAFETY BEAM GUIDE RAIL reduces danger at bridge approaches on this newly extended street. Broad surfaces clearly define road area—exceptional visibility at night or in fog. Easily installed—no special tools. Many uses—from parking lot bumpers to roadway diversions and temporary traffic diversion.

ROSCO STREET NAME and TRAFFIC CONTROL SIGNS used by more communities—than any other kind—to economically reduce accidents, improve traffic control and street appearance. Clearly legible for years. Easily installed with interchangeable parts for many types of installations. Full range of stock designs.

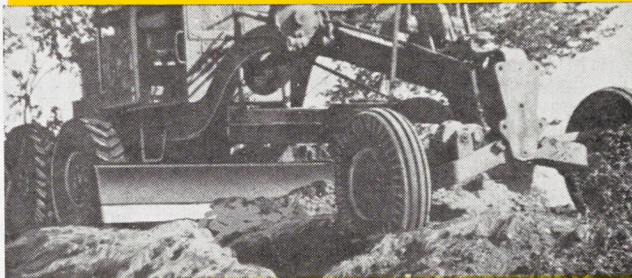

ROSCO K-D PLATE PIPE ARCH installation on new Banff-Jasper Highway—15' 10" span; 9' 10" rise; 108' long. Also round pipe, arch and special shapes.

ROSCO CORRUGATED STEEL CULVERT PIPE for most drainage structures—standard round, pipe arch and arches—plain galvanized or asphalt coated.

ROSCO SNOW FENCE keeps this highway clear of drifting snow. Prime quality pickets 1½" x ¾" x 48", spaced 2" apart. Painted with red oxide preservative. Loomed with heavy, copper bearing galvanized wire. Also posts in 3 designs—strong, easy to attach.

ROSCO GRADER BLADES—standard highway punched. Fit any mold board. Withstand abrasion and impact. Rolled to precise dimensions from special open-hearth steel to exceed highway specifications. Standard lengths in ½" and ¾" thicknesses.

Improve your community at low cost. Full details, prices and engineering service available at your nearest Rosco sales office.

the Municipal Engineer and FAIRBANKS-MORSE

There are about 4,000 urban and rural municipalities in Canada, each with its own governing body. In most of these, and closely bound to the preservation of an orderly community life is the Municipal Engineer.

Depending on the size of the community, his tasks are varied. He may plan and direct the installation of giant pumping stations, reservoirs and filtration plants; work out the problems of adequate sewage disposal; supervise the construc-

tion of roads, bridges and municipal buildings, and even cope with the headaches of traffic control.

In Canadian communities across the country, Municipal Engineers have come to depend on Fairbanks-Morse equipment for dependable, economical service. To them, F-M has long been the reliable supplier of Diesel power for municipal service, of heavy duty pumps for water supply and sewage disposal, and for a variety of construction and maintenance equipment.

Look to **THE LAST COST FIRST !**

When determining the final cost of the motor graders you buy, it is important to consider what you pay for them — the work you do with them — *and the service behind them !*

In prairie towns and cities Cat Diesel Motor Graders have a job-proven record of consistently high production, low operating cost and year-'round job-versatility.

Service from your prairie Caterpillar dealer is always available with genuine parts, workshop facilities and mobile service units . . . together with skilled personnel to maintain the "Caterpillar Quality" that adds up to lower final cost !

National Class 2000 Cash Register provides control over receipts in Office of City-treasurer, Magog, Quebec.

**"No charts...
No mental effort...
with National control!"**

—says **Mr. Roger A. Boudreau,**
Secretary-Treasurer, City of Magog, Quebec

National Class 31 Accounting Machine in Office of Secretary-treasurer, City of Magog, Quebec.

"For some time past," writes Mr. Boudreau, "the elected officials of the City of Magog and myself have realized the necessity of mechanizing our accounting procedure. A thorough investigation showed us that only National could supply us with a complete and practical system.

"Now, after using our Nationals for many months, we are convinced that we made the right choice. We are delighted with their many time-and-money saving features and particularly with the fact that Nationals give us absolute control over all cash receipts.

"Our National Class 31 Accounting Machine gives outstanding results on water billing, payroll, accounts receivable, accounts payable, etc., and I always marvel at the ease with which it *automatically calculates* our three-step electricity bills . . . *no charts, no mental effort!*

"Our National Class 2000 Cash Register provides an efficient control over all receipts and furnishes a daily summary of these receipts by classification."

.

If you would like to eliminate needless mental strain in *your* office and obtain absolute control of cash receipts classified by distribution of revenue—and at the same time improve your record-keeping—'phone or write today to your nearest National representative. Remember, there's a National System—at an economic price—for every type of office, large or small.

It won't let you down

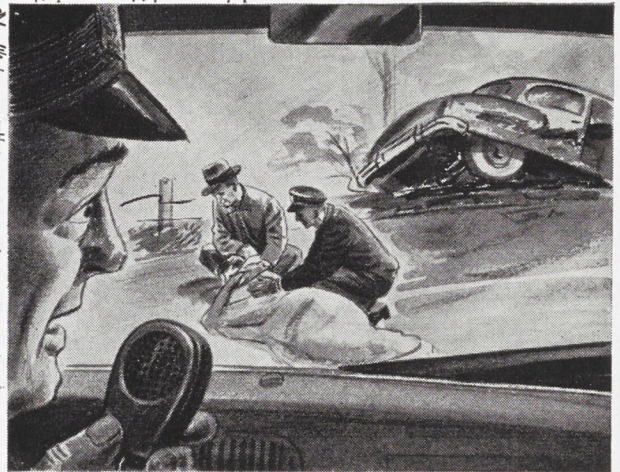

CONTINUOUS DUTY OPERATION **Marconi** 2-WAY RADIO takes you everywhere in an emergency

It's in times of crisis . . . an automobile accident, city fire or forest fire, that the instant communication provided by 2-way radio can help save lives and property — if it operates properly!

Because MARCONI 2-way radio is designed to give "Continuous Duty Operation," that is, operate 24 hours of the day indefinitely without breakdown or loss of power, MARCONI equipment always operates properly . . . has longer life and reduced maintenance and repair costs.

Why not let MARCONI specialists analyze your operation and recommend the type of equipment that will most efficiently and economically suit your particular requirements?

What's more, if repair work is needed, you can always count on extra fast service because wherever you operate in Canada, there's always a Marconi expert nearby. Replacement parts are always available.

In addition to increasing fire and police protection, Marconi 2-Way Radio increases efficiency of construction and road building, logging, mining, truck-transport and taxi operations.

Marconi

CANADIAN MARCONI

COMPANY

CANADA'S LARGEST ELECTRONIC SPECIALISTS

Continuous Duty Operation for Mobile Radio was first originated in Canada by MARCONI

**Widest choice
and wisest choice . . .**

GMC Blue Chip school bus chassis!

**GMC offers you a wide choice of wheelbases
to meet all passenger requirements!**

Again in '56, GMC leads the field in school bus chassis! First and foremost, GMC offers you a really wide choice of wheelbases, enabling you to choose the one that fits your exact needs. Frames are strong, wide, rigidly enforced. And GMC school bus chassis feature a short turning radius plus power brakes* and optional power steering at extra cost for easier handling. Best of all, your choice of increased valve-in-head power, coupled with the right transmission and rear axle, gives you the maximum in economy, performance and power!

Before you buy, see your GMC dealer. He'll be glad to give you the entire story about GMC school bus chassis . . . and you'll be glad you heard it!

*Standard on 9600-9700 series.
Optional at extra cost on 9500 series.

The less they have to work, the better!...

HERE'S ONE PLACE where cobwebs would be strictly O.K.—on piping maintenance tools. For the less they have to work, the lower your maintenance costs. Excessive valve maintenance is serious simply because the average plant has so many valves. So it's sound economics and good business to buy quality and low maintenance rather than "bargains" and frequent maintenance.

Naturally, the thrifty buyer always chooses quality valves, and for biggest value he insists on Crane. There's no greater assurance of dependable, low-cost performance... and the Crane line provides such quality in valves for every need.

For complete information on the Crane Valves to meet your particular requirements, ask your Crane representative, or Crane Branch—or write

P&H 55TC
MITI-MITE

leads the pack!

. . . in capacity,
speed, earning power

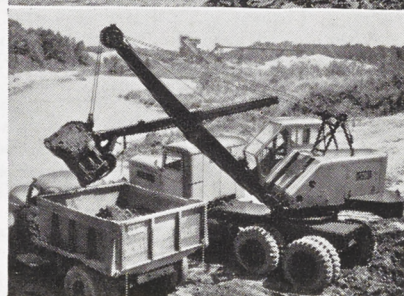

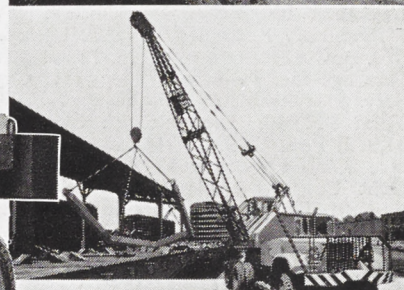

Full convertible.
Buckets from 20 to 32 in.
8 tons capacity as a crane.

Don't limit your production to the pace of old-fashioned machines . . . when you can buy the fast and modern P & H MITI-MITE at such a low price! Hundreds already in service all over the country and plenty more on the way!

Once you see it you'll agree, MITI-MITE is the most rugged little truck crane ever built. Take MITI-MITE anywhere—use it for all jobs . . . many that normally call for bigger machines. *Pocket the savings!* Watch how MITI-MITE handles standard heavy-duty attachments at maximum boom lengths. See the heavy-duty hoe and compare it with any other on the market. MITI-MITE works day after day with only gas and oil maintenance.

MITI-MITE leads the pack . . . the biggest and best producer in its class . . . at a new low price you won't pass up.

CP POWER VANE *Rotary* COMPRESSORS

Attention City Engineers, Road Superintendents and Waterworks Chiefs

CHICAGO PNEUMATIC OFFERS A COMPLETE LINE OF "POWER VANE" ROTARY COMPRESSORS (GAS & DIESEL) CAPACITIES; 125, 210, 365, 600, 900 C.F.M.

CAPACITY CONTROL

The regulator automatically varies the output from zero to full capacity within a pressure range of 10 lbs. It varies the engine speed gradually from full to approximately two-thirds speed with a proportionate reduction in compressor output. If the compressor continues then to supply more air than is being used, an unloader gradually closes the compressor intake, with further speed reduction, to interrupt delivery until more air is required.

TILT OPERATION

All models (except the 210 RG-2) are suitable for operation at angles up to 30 degrees from the horizontal, lengthwise, or 25 degrees sidewise — conditions frequently encountered in pipeline work. The 210 RG-2 model is limited to 15° tilt in any direction.

City Engineers across Canada are pleased with the top-flight performance and economy of operation of the Chicago Pneumatic Rotary Compressors.

Announcing **DRAVO'S** COMPLETE LINE OF HEATERS

THE DRAVO
Counterflo...
40 Models
400,000 to 2,000,000 Btu/hr output
For large commercial and industrial buildings

THE DRAVO
Paraflo...
4 Models
200,000 to 250,000 Btu/hr output
For smaller industrial or commercial buildings

THE DRAVO
Gas Fired
UNIT HEATER...
68,000 to 172,000 Btu/hr output
10 Models
For stores, service stations and other small buildings

ALL DRAVO HEATERS have automatic temperature control and a minimum efficiency of 80% . . . require no ductwork . . . are ideal for heating in the winter, ventilation in the summer and for process drying.

Officials: Mayor, C. Floden also Chrm. Pub. Wks. Comm.; Sec.-Treas., W. S. Murray. **Assessment:** Municipal purposes \$2,408,070, exempt \$204,853. **Area:** 823 acres. **Roads & Streets:** 45 mi.; gravel 8, earth 35.5 mi. **Curr. Tax Levy** \$148,-

7 ways to cut municipal costs . . .

PUBLIC UTILITIES

1. By increasing the effective co-ordination of construction schedules and emergency crews, a 2-Way Radio installation is equivalent to a 10% increase in manpower — with no increase in your payroll.
2. This effective channel of communication makes it possible to cut-in power lines with the least possible delay and greater safety for any number of crews working on the lines . . . giving better service and protection to the citizens of your community.

PUBLIC WORKS

3. How often a municipal engineer has said: "Too bad I didn't hear about it this morning". With time a valuable factor in providing service and meeting emergencies, engineers have immediate contact with crews and equipment, eliminating costly delays and speeding up work completion.
4. By more efficient use of trucks and similar equipment, 2-Way Radio can also save up to 10% in capital investment.

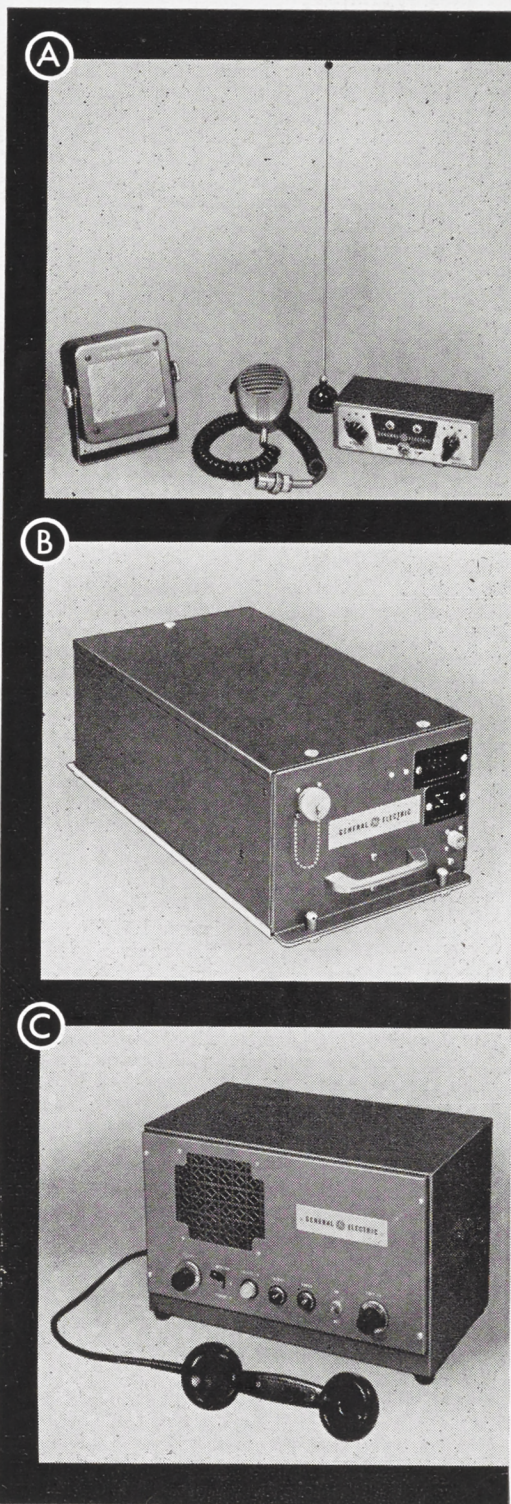

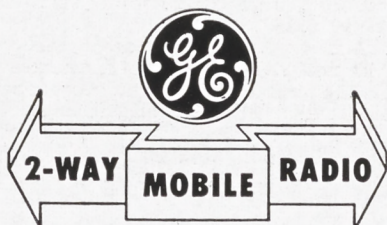

FIRE DEPARTMENTS

5. One of the most rewarding uses of 2-Way Radio is the quicker more efficient dispatch of fire fighting equipment in any area of protection. Crew training can also be carried on more efficiently away from the firehall and still have trucks and pumps on instant call.
6. Same protection at lower capital cost — vehicles do not have to be moved unless they are really needed. Reserve equipment is held on "stand-by".

POLICE DEPARTMENT

7. The greater efficiency of 2-Way Radio communication adds cruisers to the road without actual investment in vehicles . . . decreases danger to the men on duty while increasing community protection.

For further information and assistance in planning effective 2-Way Radio communications, write to Electronic Equipment Marketing, Canadian General Electric Co. Ltd., 830 Lansdowne Ave., Toronto, Ont.

- MAXIMUM ECONOMY
 - LOW COST
 - MAXIMUM EFFICIENCY
 - INTERCHANGEABLE
- By combining "A" and "B" you have an MC-208 Mobile Unit.
By combining "B" and "C" you have an SC-241 Station Unit.

ALBERTA MUNICIPALITIES

REDUCE LABOR COSTS up to 75% by using

The HIAB TRUCK MOUNTED HYDRAULIC CRANE

- one ton lifting capacity.
- fits into one foot of space behind the cab of any 2½-ton truck or larger, leaving the remainder of the truck platform completely clear.
- fully hydraulic operation, including 190° power traverse.
- boom is easily adjustable from 3½ feet to 11½ feet in length.
- load can be lifted from 10 feet below ground to 23 feet above ground.
- dual control levers are located on both sides of the truck.
- the Hiab crane can also be used as a winch with a pull of 5 tons ... without additional attachments.
- few wearing parts and rugged all-steel construction make the crane a bear for hard use and long life.
- when mounted on a dump truck, the Hiab crane may also be used as the lifting unit for the dump body, thereby eliminating the cost of the standard dump hoist.

FOR YOUR

Community Park or Playground

a modern

WADING POOL

Costs Only \$90⁰⁰ Complete

Economy isn't the only feature of the ELSRO WADING POOL that makes it ideal for your community park or playground. It's so much easier to build than standard concrete-type pools, and it won't heave or crack in severe weather conditions. Made of pliable ELSRO ASPHALT planking, it's completely waterproof . . . durable . . . and affords traction, making it entirely safe for children. ELSRO WADING POOLS can be built to any size, shape or depth desired. Complete free plans available on request.

ELSRO

Asphalt LTD.

HOW IT IS INSTALLED

Construction of this 15 feet x 20 feet ELSRO WADING POOL is simple and requires no special tools or mixing. Comes as a complete unit, including ELSRO ASPHALT planking in sheets up to 10 feet x 16 inches, special caulking compound, and asphalt surfacing mix. Complete construction and installation directions included.

PREFABRICATED ASPHALT SIDEWALKS

Will not crack, crumble or decay — frost heaves will not damage. Economical and easy to install. Write for more information today.

10336 VILLA AVE. • EDMONTON, ALTA.

MOST TOWNS SAY McAVITY WHEN THEY WANT HYDRANTS

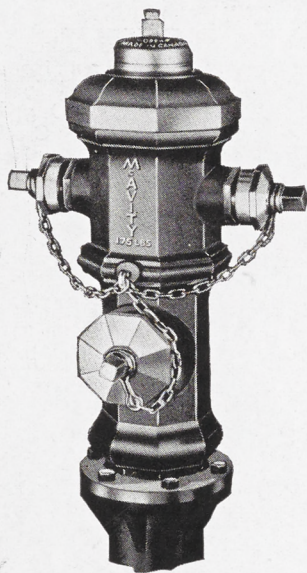

Fig. 9658

Fig. 9658. This modern, octagonal body hydrant provides extra large capacity and a pleasing appearance. Of sliding gate type, it is flanged at the ground line and is automatically self-draining.

One of Canada's oldest names in hydrants, McAVITY offers types and sizes to meet all needs—for large or small communities, factories, or lumber yards. And each is built to give unfailing service under all conditions.

Both compression and sliding gate types are produced with threads, operating nuts, inlet connections and bury to meet the customer's specifications.

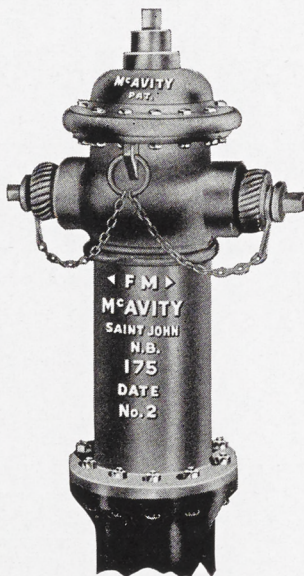

Fig. 6431

Figure 6431. A compression-type hydrant with main valve opening against the water pressure. Developed to meet the exacting specifications of the Associated Factory Mutual Fire Insurance Companies . . . and carrying their "FM" approval mark.

**CHAMPION
and KOLLMAN**

**MAINTENANCE EQUIPMENT for
Towns, Cities and Municipalities**

City engineers, road and waterworks superintendents are enthusiastic boosters for Chausse Champion and Kollman Maintenance Equipment. Whether it's a Sewer Cleaner, Sand Spreader, Asphalt Distributor or Steam Generator, Chausse or Kollman

Equipment means quality and reliable operation backed by nation-wide service and sales. A demonstration of any of the models illustrated will gladly be given or more complete information forwarded to you.

CHS-1000 CHAUSSE STEAM GENERATOR

This unit was designed primarily for thawing out culverts, cleaning machinery, etc. Complete with siphon type injector. The pressure of live steam through injector lines siphons cold water up suction tube where it mixes with steam and enters the boiler as hot water. No pumping—yet

water refills your boiler even while it is under pressure SAFELY.

May be purchased as a skid mounted unit or mounted on two 600 x 16 pneumatic tires complete with springs and axle for easy trailing.

Jensen. *Hospitals:* Drumheller Municipal: Box 450; Beds 105; Budg. \$290,000; Pers. 86; Adm., Leonard Wilson; Chrm. Bd., J. Cramer; Pres. Med. Staff, Dr. A. J. Walker (\$82,500 improvement program planned). *Fire Dept.:* Chief W. M. Guterson; electric alarm 3 H.P.; 20 firemen, 2 paid, 18 volun.; C. D. Dir., F. Porter; water supply, elev. tank 225,000 gals.; hydrants 41; C.D. aux. firemen 30; 1 fire hall; hose $2\frac{1}{2}$ ", 2000', $1\frac{1}{2}$ " 500', 20' suction hose; motorized apparatus 2: one 420 gpm., 500 gals., one 500 gpm. aux. 1500 U.S. gals.; extra siren on hospital, C.N.R. equipment. *Waterworks:* Supply: pumped from 3 wells; one 16' diam. cemented well, one 8' diam. cemented well and one 38" diam. gravel-wall well. Pumps: 1 elect. service pump, 600 gpm.; 1 elect.

WOOD

FIRST

again

... first in truck equipment and municipal sales in Canada. Only dependable, quality equipment could gain and maintain such a position among men who carefully measure their purchases.

... first in design advancements. Wood equipment unquestionably has led the field in the development of equipment to keep abreast of the truckers' and town and city needs. Thirty years of "firsts" such as the rolling wedge lifting principle and a host of other advancements give proof to engineering leadership. Today, roller-bearing pumps on *all* Wood hoists signify continued leadership.

... first for completeness of line. Only Wood provides such ample selection of models and sizes that enables you to make the best all-round investment. And the complete line is engineered and built in Canada.

Wood is **FIRST** in sales because Wood is **FIRST** in value. For details on the Wood equipment for your needs, consult—

HUSKY ASPHALT

PRODUCTS INCLUDE

- ROAD ASPHALTS - Cutback and Penetration Asphalts. Also New Rubberized cutback and penetration Asphalts (Benson Process). Dust Stabilizers).
- ROOFING ASPHALTS - Felt saturants and coatings: Flat and steep roofing asphalts.
- BRIQUETTE BINDERS - and Coal Spray Oils
- PIPELINE ENAMEL & PRIMER - For Gas and Oil Pipelines.
- CATALYTIC ASPHALT FOR CANAL AND RESERVOIR LININGS - For Waterproof membranes in Highway Subgrades.
- DAMP-PROOFING & WATER-PROOFING ASPHALTS.
- EMULSION BASE ASPHALTS.
- ASPHALT PRIMERS - BATTERY SEALS.
- CRACK AND JOINT FILLERS.
- WOOD PRESERVATIVE OILS, BINDERS, ADHESIVES, Etc.
- ASPHALT FOR UNDERSEALING PORTLAND CEMENT.
- DOMESTIC AND INDUSTRIAL FUELS.

SEWER SEAL

HUSKY

high quality asphalt is in use not only in street and highway construction, but also in varied manufacturing processes. Asphalt is a low cost, waterproof thermal plastic, highly adhesive and resistant to acids and alkalis.

Husky Asphalts are being engineered for special purposes in various industries, and can be developed for other uses.

U. S. MOTORS

The Most Complete Line of
GENERATING PLANTS
offered by one manufacturer

Need a portable?
Here's a typical U.S. Motors Corporation Portable Gasoline Set, Model P.102 B8S36-T1, 1250 Watts, 110 volt, 60 cycles—sturdy construction, capable of handling overloads without excessive drop in voltage. All U.S. Motors Air-Cooled models incorporate rugged 4-cycle engines, from 500 to 6,000 watts.

Here's one of the larger U.S. Motors Corporation Diesel Plants—ideal as a Power source for Crushing Plants, Asphalt Plants, Banks of Welders, etc. This is model 100 D18-P2, rated at 100 KW and powered by the famous 6 WAKD Waukesha Diesel Engine—other models from 5KW to 200 KW, in gasoline, diesel, natural gas and propane. Manual, push-button, remote, or automatic starting available for all models.

U.S. Motors sets are also offered complete with Highway Trailers and Weather Proof Housings, as well as a choice of many other Accessories and Control arrangements.

Send for Bulletin No. 1700 describing the complete line of U.S. Motors Sets.

Falher (Village)

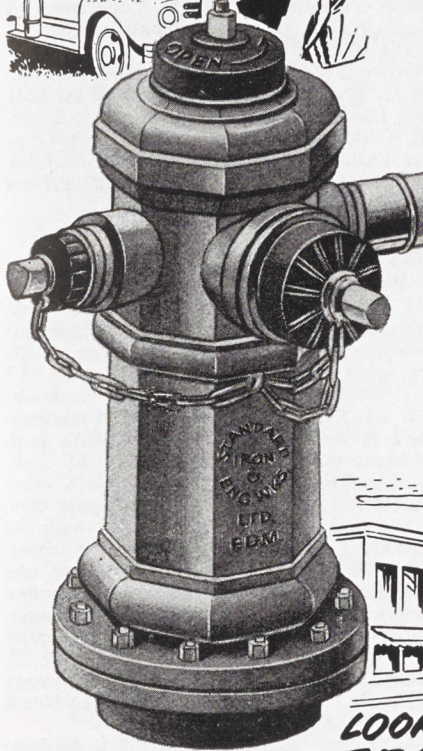

Population 720

Officials: Mayor, P. A. Sicotte; Sec.-Treas., T. A. Moulun. *Assessment:* Municipal purposes \$635,367, exempt \$441,050. *Area:* 133 acres. *Roads & Streets:* 1.86 mi., gravel. *Curr. Tax Levy:* \$40,484, collected \$32,544. *Schools:* Cons. High School;

STANDARD #35 COMPRESSION HYDRANTS

"Engineered for Endurance"

All Hydrants are much alike to look at, but the Standard "35" Compression Hydrant excels in essential features through the embodiment of the latest in engineering design. It opens positively against pressure and closes easily with the assistance of the water pressure which helps maintain a closed valve when the top barrel is broken off. Any size nozzles, bury or boot connections supplied to your specifications. Get the facts about Standard Hydrants — compression or gate-type — a 100% Western Canadian Product, engineered and manufactured in Edmonton, Alberta.

*Safeguard
YOUR COMMUNITY!*

LOOK AT THESE FEATURES:

- Double valve seat sealing with mechanical bronze to bronze and "O" ring safety seal, at lowest market replacement cost.
- Safety wing valve retainer eliminates "drop thru" into boot on valve reassembly. No more digging hydrants on maintenance or servicing.
- Oversize barrel and ports assure adequate water volume to nozzles.
- Heavy duty cast iron body, flanged and bolted at ground line, two inches over specified bury for folt clearance.

These are the practical and much advanced features of the Standard Compression Hydrant #35 which is the choice of discerning engineers and municipalities everywhere. A letter will bring you full details and advice by return!

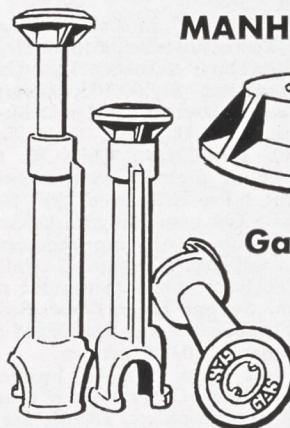

"Standard" SUPPLIES ALL MUNICIPAL REQUIREMENTS!

MacDonnell; water supply reservoir & lake 100,000 gals., elev. tower 65,000 gals.; 1 fire hall; 52 hydrants; hose 2½" 1750', 1½" 850'; motorized apparatus 1 modern unit 350 gals., 1 unit V8 with gear pump capacity; mutual aid R.C.A.F. Beaverlodge & Hythe. *Waterworks*: Supply: from Bear Lake. Pumps: one 112 gpm. & one 54 gpm. elect. pumps at filtration plant. Reservoirs: 1 concrete 100,000 gal. & 1 elev. tank 50,000 gal. Purification: rapid sand filtration & chemical treatment. Distribution: C.I. mains 3½ mi., 8-4"; asb. cement pipe 5 mi., 10-4". Hydrants: 53; Income \$58,050; Expenditure \$51,919. *Sewage Treat. Plant*: activated sludge plant built 1938; design capacity 50,000 gpd.; sludge treated by digestion & dried on drying beds; effluent discharged to Bear Creek.

Financial: Revenue: Taxes: real prop. \$285,352, business \$18,343, poll \$2,208, other \$18,660; Licenses & Permits \$3,434; Rents, Concessions & Franchises \$8,660; Fines \$4,754; Int., Tax Penalties, etc. \$2,075; Serv. Chgs. \$206; Rec. & Comm.

**FOR MUNICIPAL GARAGES - SKATING RINKS -
COMMUNITY & SPORTS BUILDINGS . . .**

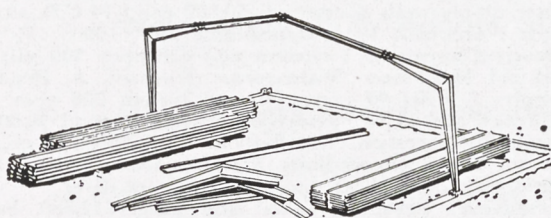

You can do all this with a **BUTLER**.

BUTLER steel building

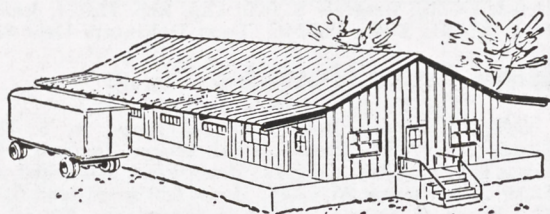

Complete it in half the time —

Half-finished at the factory—with precision die-formed and punched cover panels—a Butler building goes up fast. It simply bolts together.

Move it quickly and conveniently —

Yes . . . move it, with 100% salvage of the original materials! Simply remove bolts, transport sections to new site, and re-assemble.

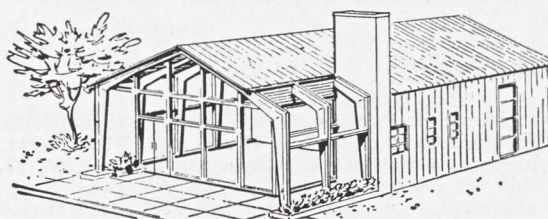

Modify it to any use —

Once a Butler building has been erected it is so easy to add to and change the design for other purposes for which the building may be required.

Expand it economically while in use —

Move out walls and bolt in new sections with less than half the usual delay and mess—and without loss of materials. Costs less too!

Finish it to any degree of beauty —

Butler buildings can be erected in designs that are attractive in appearance for libraries, police stations, public works buildings and other community projects.

Use it in any climate —

Designed to seal tight—and precision made—a Butler building is storm-proof. Easily insulated against tropic or arctic weather.

. . . and buy it for **LESS** *than a conventional building!*

Yes, Butler's modern engineering and mass production have created a modern building that saves you money right down the line—on erection,

materials and maintenance costs. Investigate Butler before you buy. Why not start now!

VITRIFIED CLAY SEWER PIPE AND FLUE LINING UNLIMITED!

We're geared to handle *all* the demands for vitrified clay sewer pipe and flue lining throughout the prairies—now and in the future. Fact is, we've never stopped growing—and we never will. Our present combined capacity is 5,500 tons per month—more than adequate to match the prairie's dynamic expansion.

For D4 and D6 Caterpillar Tractors

Barber LOADER-DOZER

Big Capacity Bucket

—enables the Barber C6 to load over 2,500 tons in a 10-hour day; the C4 over 2,000 tons; under ideal conditions.

Rugged Yoke

—especially designed and fabricated to stand the stress and strain of tough jobs, big loads and rough usage.

Clear Deck

—free from crosslines. Gives operator clear view of work and working faces.

Moulded Guard

—Made of 1/4-inch steel. Gives ample protection to radiator and engine from dirt and stones.

Complete Caterpillar Hydraulic System

—built under the guard. Assures exceptional efficiency and economy. Experienced service available from all Caterpillar dealers.

Manganese Cutting Edge and Corners on Bucket

—speeds digging. Gives longer life to bucket. Replaceable right on the job.

Reinforced Cab

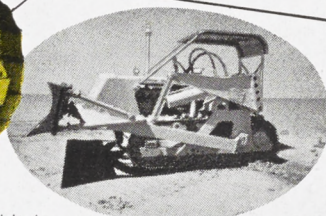

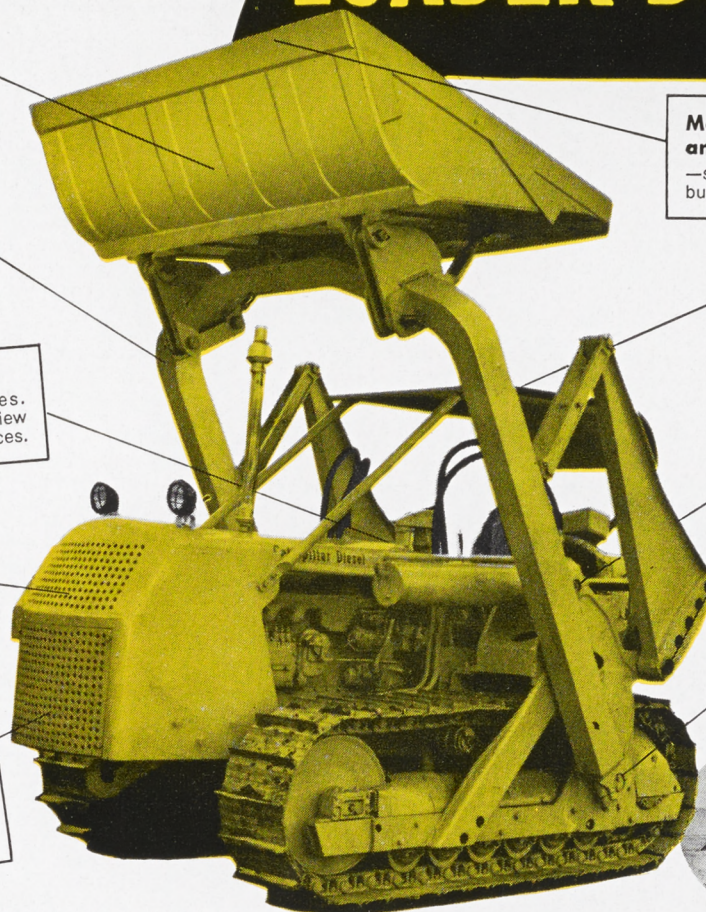

—provides safety and protection for operator. Free access to cab at all times.

Hardened Steel Bearings

—on cylinder trunnions and pick-up arms. Zerk fittings on all moving parts.

Replaceable Fulcrum Bearings

—can be replaced right on the job. Can also be turned 180 degrees to double their life.

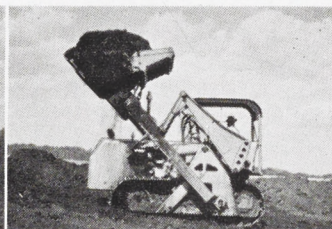

**COMPLETE TRACK OSCILLATION AT ALL TIMES
WITH BUCKET OR BLADE**

Ruggedly constructed dozer blade assembly. Overhead action gives dozer blade highest lift of any machine.

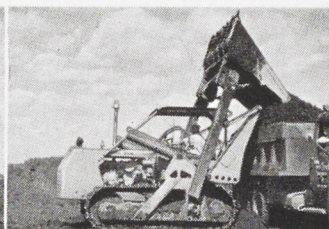

COMPLETES ITS FULL WORK CYCLE IN LESS THAN 30 SECONDS

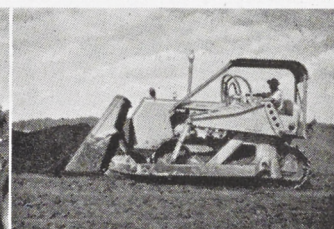

With full load operator starts to elevate bucket and back tractor from work-face.

As bucket moves up and back through carry position tractor also moves back. No pivoting necessary.

When bucket has reached dump position tractor has moved back approximately one tractor length.

As empty bucket moves forward and down, tractor moves forward to work-face. Completes full work cycle in less than 30 seconds.

the taxpayer's best friend

Good municipal buying gives the taxpayer maximum returns for each tax dollar he spends. That is why clay pipe sewers are the best buy a community can make. Nothing a town or city buys will outlast a clay pipe sewerage system . . . and most things purchased with tax dollars will be repaired, discarded and replaced ages before clay pipe reaches its childhood. In the beginning clay pipe may cost a few cents more a foot than some other sewer pipes . . . but no pipe can come close to its cost per year of service.

there is no substitute for **CLAY PIPE**

MANITOBANS

*Prepay Hospital Bills
through*

Blue Cross

The problem of unexpected hospital bills will face *one* out of every *three* families in your community this year. How this will effect them will depend upon how well they are prepared to meet the expense.

Today, over three hundred and sixty thousand Manitobans know that their hospital bills will be of little concern to themselves or their community, because they have "PREPAID" the BLUE CROSS way.

BLUE CROSS, a non-profit province-wide plan offered by the Manitoba Hospital Service Association, works best for everyone concerned — patient, hospital, doctor, and municipality. This is because BLUE CROSS is actually an extension of hospital service.

IT'S WISE TO BE *sure* WITH
BLUE CROSS

For further details contact your local BLUE CROSS representative or your nearest BLUE CROSS office.

It takes experience and "Know-How"

Just as experience and knowledge speed and assure the satisfactory laying of a sewer, or any other municipal project, so are they essential to successful municipal financing.

In our more than sixty-five years of business we have been of service to many municipalities and have had considerable experience in the planning and placing of their debentures. Our services and facilities throughout Canada are available to everyone interested.

Tough Team mate For Your 'International'

MALO OVERHEAD LOADER-DOZER

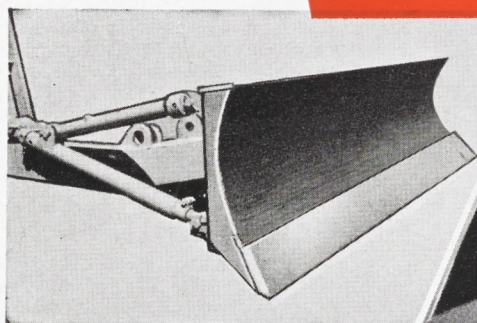

Fast, too! Just Scoops Up,
Backs Up, Dumps. The
Fastest Cycle and Shortest
Travel of Any Loader Made.

- Completes full work cycle in less than ½ a minute.
- Loads your truck in less than a tractor length.

**Absolutely No Tractor
Modification Necessary**

Complete track
oscillation at
all times

The MALO Overhead Loader-Dozer is a rugged, big-yardage machine that loads up to 2,600 tons per day. It is engineered for hard service, long life and low cost operation through such features as an even load distribution without counter-weights, low pressure hydraulic system, 12" to 18" dig below ground level, replaceable fulcrum bearings, and other exclusive features.

Convertible to high lift, high-leverage dozer blade in a matter of minutes.

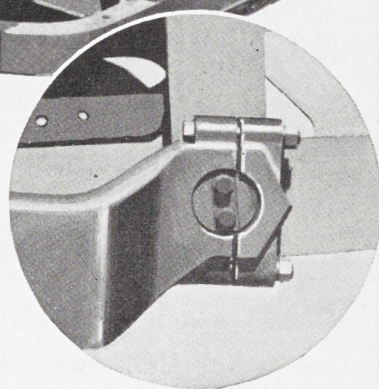

Now. Replaceable Cutting Edge and Corner Shoes on Bucket.

Manufactured by
BARBER MACHINERY LTD
CALGARY, ALTA.

Replaceable, reversible and interchangeable fulcrum bearings that can be readily serviced by the operator.

The nation's work horses!

'Jeep' 4Wheel-drive VEHICLES

**go anywhere
-anytime**

**for municipal
maintenance**

Wherever the job, regardless of weather or ground conditions, a sure-footed 'Jeep' vehicle will get there, with men, equipment or payload. Shifting instantly from 2-wheel drive to the added traction of all four wheels, they go through sand, mud, snow and navigate the steepest grades with ease.

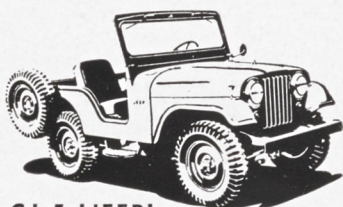

'JEEP' - A-TRENCH

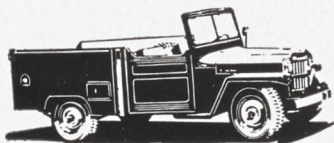

DOZER BLADE

The most versatile vehicles ever built!

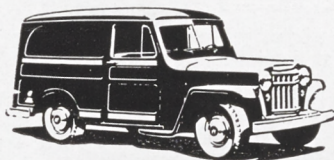

CJ-5 'JEEP'

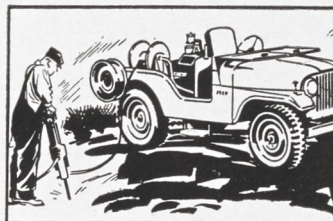

**'JEEP' CARGO
PERSONNEL CARRIER**

**'JEEP'
SEDAN
DELIVERY**

Every 'Jeep' vehicle has 3 power take-off points available. Each is a mobile power plant, delivers ready auxiliary power anywhere to operate compressors, generators, belt-driven equipment and winches. And there's over fifty pieces of special equipment to make 'Jeep' 4-wheel drive vehicles the handiest, most useful and profitable investment any business could make!

COMPRESSOR

WINCH

**For the toughest "impossible" jobs
the world automatically thinks of 'Jeep'**

Elliott

ADDRESSING MACHINES

are the answer
to your

MAILING PROBLEMS

The only typewritable addressing system with address plates that file like index cards.

That's right!

Elliott's ADDRESS CARDS

... are prepared on any standard typewriter — lightweight, space saving, and guaranteed for a minimum of 10,000 clear legible address impressions. Over 40 different models of Elliott addressers ranging from the economy-priced Addresserette through tabulating and sensing models for record keeping and analysis. Whether for city, administration, hospital, school or utility billings, high-speed mailings, etc., there is an Elliott addressing system tailored to fit your specific needs.

HORTON STEEL *Elevated Tanks* **FOR SCARBOROUGH, ONTARIO WATER DISTRIBUTION SYSTEM**

Since 1946, the Scarborough Public Utilities Commission has installed four Horton tanks for the community's water distribution system. Shown above is a 208,170 Imp. gal. ellipsoidal-bottom elevated tank recently completed.

In many water distribution systems 'Distributed Storage' is often the more advantageous water storage method. When this method is used instead of one large tank, several tanks are installed at different locations near the centre of an area of heavy demand. Thus peak load conditions are met adequately from elevated storage located proximate to the demand.

For information, or tenders — on any type of steel tank or plate work — write our nearest office.

4½ MILLION CANADIANS NOW PROTECTED BY GROUP LIFE INSURANCE

Today, in Canada, 4½ million men and women are protected in the modern 'group' way for an amount of 5½ billion dollars, an increase of over \$4 billion in the past ten years. The benefits of Life, Disability, Accident and Sickness insurance are available to groups of 10 or more persons regardless of age and other conditions which often preclude such protection under individual policies. Group Pension plans have also shown a remarkable increase and play a great part in the economic well-being of Canadian men and women. The tremendous increase in coverage during the past decade is the best evidence of the value placed in these group contracts by employees and employers alike.

The SUN LIFE ASSURANCE COMPANY OF CANADA, one of the great life insurance companies of the world, is the pioneer Canadian company in the field of group insurance and has designed thousands of group welfare and retirement plans over the past 36 years. Sun Life's expert advisory and technical service is available at all times from key centres in more than twenty countries around the world, and from coast to coast in Canada.

SUN LIFE OF CANADA

Announcing the New SHAWNEE "SCOUT" Backhoe

MODEL D70HL

SHAWNEE OFFERS MORE FEATURES...FOR LESS MONEY!

SHAWNEE "SCOUT" MODEL D-70-HL...Now designed with hydraulic "feet" for quick leveling-up to dig plumb holes. This powerful backhoe is ready for work *seconds* after the tractor stops rolling...and working on slopes or with one wheel on a curbing makes no difference...just level-up and go to work.

'SHAWNEE "SPECIAL" LOADER... Perfect teammate for the new D-70-HL Backhoe. It provides a balanced unit regardless of which tool is being used. Various attachments available to replace bucket (shown below) add to its versatility.

Twin or single cylinders optional—double acting cylinders throughout.

Bucket roll back, down pressure. Capacities, 11 cu. ft., 1/2 yd., 5/8 yd. 2,000 lb. lift to 9 ft. dumping height.

Frame slides into permanently mounted "U" bracket.

All welded box frame construction eliminates racking.

Chromium plated rods—polished cases.

Zerk fittings at all wear points.

Exclusive, patented drag line principle produces digging force of approximately 5,000 lbs. at bucket teeth.

6-bank, free-flowing valve system—can operate 2 or more at once.

Bucket widths, 12" to 24" inclusive. Flat bottom buckets, 32" and 36".

NEW!
INDIVIDUALLY
CONTROLLED
**HYDRAULIC
STABILIZERS**

Assure Watertight Joints with HUSKY SEWER SEAL

PLASTIC or HOT TYPE

An asphalt product compounded especially for sealing joints of VITRIFIED CLAY, CONCRETE, CAST IRON and STEEL PIPE. The advantages of this type of compound are so numerous that other types are seldom considered.

HUSKY SEWER SEAL IS...

ROOT RESISTANT ... Stops leakage and ingrowing of tree roots.

MAKES A WATERTIGHT JOINT ... even with highly glazed surfaces.

EASY TO APPLY ... Plastic Type is easily moulded on to or caulked into the joint; Hot Type is readily poured into the joint either in a vertical or horizontal position.

ACID and ALKALI RESISTANT ... thus eliminating troubles inherent in masonry or metallic jointing compounds. It is chemically inert.

SUFFICIENTLY FLEXIBLE ... to allow settling or shifting of the pipe without breaking the joint or tile.

STRONG ... Pipe may be handled after joining and will withstand high hydrostatic pressures.

PERMANENT ... Will not change characteristics, crack or disintegrate.

ECONOMICAL in material and labor costs.

Full information on request...

CHEAPLY**

CHEMICALS

SAND OR GRAVEL

COAL

CEMENT

SALT OR BRINE

ASHES OR SLAG

DIVERSIPIPE . . . the super flexible rubber pipe with "Divers" uses for conducting corrosive chemicals and abrasive materials

Diversipipe available with either Full Face Flanged End or new type Beaded End as illustrated.

Diversipipe has many special features for conducting corrosive chemicals and abrasive materials more efficiently—more economically. It is light, is easily and quickly installed, wire reinforced wrapped fabric construction resists crushing or kinking and is non-collapsing under suction.

This rugged rubber pipe is in regular service conducting foundry sand and mine back fill. It is also ideal in such plants as vinegar, salt, cement, stone crushing—in grain elevators, coal mines, and copper refineries. Diversipipe is built to give outstanding service under the most punishing conditions.

To find out how Diversipipe can simplify your material conveying problems contact your nearest Goodyear Branch at Moncton, Quebec City, Montreal, Toronto, London, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver.

Typical Onondaga County treated gravel road

A net saving of \$65 per mile per year on the maintenance of gravel roads as a result of calcium chloride treatment has been reported by E. M. Bayland; superintendant of Highways for Onondaga County, New York.

Based on a 16 year performance study sponsored by the Secondary Roads Committee of the Highway Research Board, Mr. Baylands report revealed an average yearly saving of \$50 in gravel and \$225 in blading per mile. Yearly cost per mile for calcium chloride treatment was \$210.

Figures on gravel savings were based on a comparison with tests on untreated roads conducted by the University of Michigan.

The Chicago Sewage Disposal System

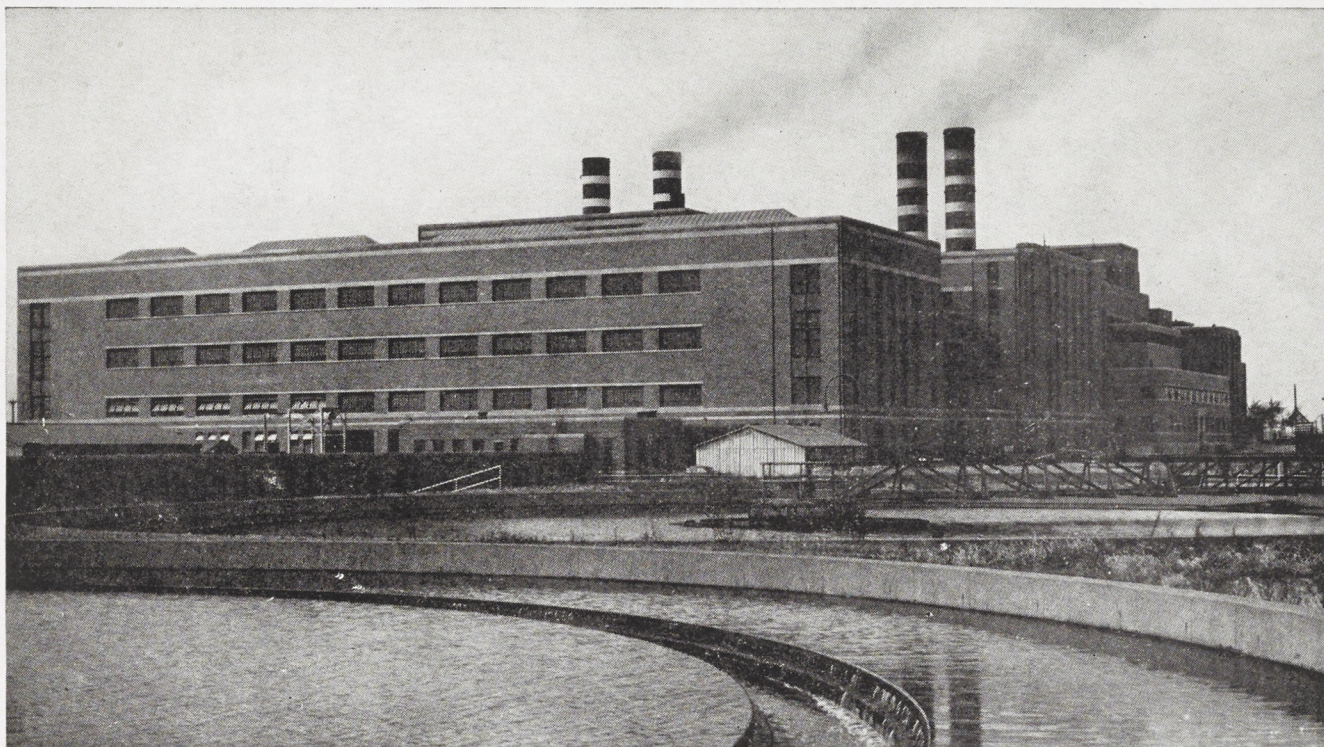

Photo courtesy CIVIL ENGINEERING

One of the 7 Civil Engineering Wonders of the United States

That's the expert opinion of the American Society of Civil Engineers. It happened October 20th, 1955, when the A.S.C.E. selected the country's seven modern wonders of civil engineering. (The other six: Colorado River Aqueduct... Empire State Building... Grand Coulee Dam... Hoover Dam... Panama Canal... San Francisco-Oakland Bay Bridge).

There's good reason why the Metropolitan Sanitary District of Greater Chicago should be so highly honored. For its Sewage Disposal System, constructed at a cost of many millions of dollars, is the largest of its kind anywhere in the world. And its construction involved exceptional achievements — such as the reversal of flow of the Chicago River, to prevent pollution of Lake Michigan, which is Chicago's fresh water source.

Some idea of the size of the facilities owned and operated by the Chicago Sanitary District

may be gained from these figures: the system treats and disposes of the sewage from a population of 4,500,000 people . . . handles Chicago's industrial wastes, which add a population equivalent of 3,000,000 more. Its plants treat more than a billion gallons of sewage a day, and discharge a clear, safe effluent.

For twenty years, Combustion Engineering, and its Raymond Division, have served the Sanitary District of Chicago. Seventeen C-E Raymond Flash Drying Systems dry or incinerate the vast quantities of filter cake produced daily, and seven C-E Pulverized Fuel-Fired Boilers provide for steam requirements. C-E is proud of this long, continuous association with Chicago's Sewage Disposal System, and extends hearty congratulations for the recognition accorded it by the American Society of Civil Engineers.

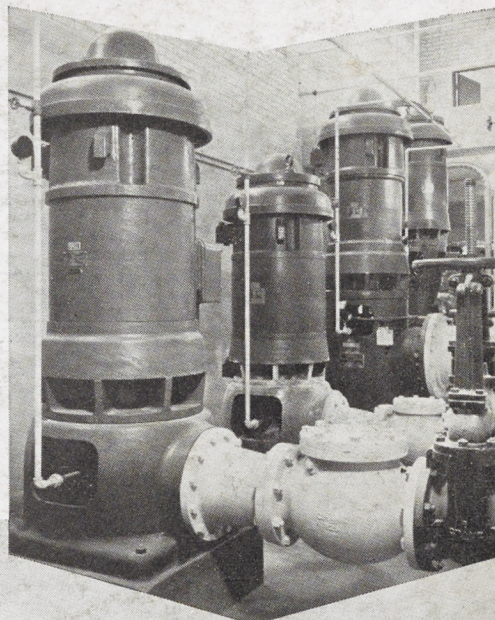

LEADERS IN STEAM GENERATION AND FUEL BURNING EQUIPMENT FOR ALL INDUSTRIES.

RED DEER, ALBERTA SOLVED A WATER SUPPLY PROBLEM . . . WITH THE HELP OF THE FOLLOWING C-I-R CAMERON PUMPS

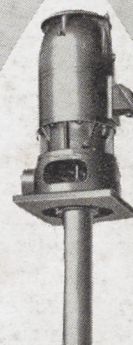

PUMP TYPE	CAPACITY USGM	TOTAL HEAD FEET	DRIVER TYPE	SERVICE
20-APH-1	5760	50	Electric Motor	Filter Wash
14-APH-4	1800	250	Electric Motor	Filtered Water
12-APH-5	960	250	Dual Drive— Electric Motor and Gasoline Engine.	Filtered Water
12-APH-5	960	250	Electric Motor	Filtered Water

THESE ARE GOOD REASONS WHY YOU SHOULD
SELECT C-I-R CAMERON VERTICAL PUMPS;

- Require minimum floor space.
- Medium to high operating heads.
- Single or multi-stage as required.
- Rugged construction.
- Economical installation and operation.
- Minimum maintenance.
- Capacities to 15,000 gpm and 250 psi.

We have 11 Branch offices to serve you with engineering information.
